

The logo for LARALAB is displayed in a white rectangular box. The text 'LARALAB' is written in a bold, black, sans-serif font. The background of the entire page features a collage of medical images, including cross-sections of biological cells and anatomical structures like a heart and blood vessels.

LARALAB

MEDICAL ENGINEER – WORKING STUDENT (m/f/d)

LARALAB's goal is to revolutionize the planning of cardiac interventions and improve the lives of patients worldwide. We are developing cloud-based planning software powered by deep learning technology to support the innovation of new minimally invasive cardiac procedures, and to make these procedures available to patients in need. We have collaborations with leading clinics and medical companies, and are backed by strong investors.

Would you like to play a role in this growth process? We are looking for a **Medical Engineer Working Student** to join our team of medical and software experts. You will contribute to the development of our impactful software products as it is our goal to receive regulatory approval and clinical application for these products. This brings you into an exciting position in our team, working on the interface of software development and quality management / regulatory affairs.

Your Skills

- Background in medical technology, computer science, engineering or related discipline, or equivalent working experience
- Analytical and structured working style with ability to quickly adapt to new topics and take over responsibility
- Experience in project work and enjoy working independently as part of an international team
- Passion in medical devices, cutting edge medical technology and artificial intelligence
- Willingness and enthusiasm to constantly improve and learn new skills
- Programming skills (e.g. Python) are a plus

Your Challenges

- Contribute in the development of next generation medical software products
- Work in the crossroad between software development and quality management
- Support the documentation activities required to release our products in the market
- Get involved in testing of our product to ensure highest safety and performance standards
- Be part of different activities (e.g., software verification, validation) throughout the software lifecycle

Be Part of Our Story – there is a lot in it for you!

- Opportunity to grow in an international company which provides a real purpose
- Dynamic start-up environment with a young, passionate, and skilled team
- Be part of the Quality Team and contribute to the improvement and development of our software
- Steep learning curve, great working environment, office centrally located in Munich
- Flexible schedule that accommodates to a busy-student-life

Sounds interesting? Send us your CV, cover letter, and relevant certificates.
Have questions? We'll be happy to answer them!
